

Information Security Basic Policy

VER. 1
AS OF JUNE 25, 2025
RIGAKU HOLDINGS CORPORATION

Information Security Basic Policy

Rigaku Holdings Corporation and its direct and indirect subsidiaries (hereinafter referred to as the “Rigaku Group”) are committed to protecting both the information assets in our possession as well as those entrusted to us by our customers. In order to earn and maintain the trust of our customers and society at large, we hereby establish the following policy and implement information security measures across the entire organization.

1. Leadership Commitment

The Rigaku Group recognizes that ensuring information security is one of its most critical management priorities. Under the leadership of executive management (including the CEO and other officers), we will strive to continuously and systematically improve our information security practices across all levels of the organization.

2. Organizational Framework

The Rigaku Group will establish a dedicated framework to promote and maintain information security. We will define and enforce internal rules and procedures to ensure effective implementation of security measures.

3. Employee Engagement

All employees of the Rigaku Group will acquire the necessary knowledge and skills to uphold information security and will actively contribute to the Group’s security initiatives.

4. Compliance with Laws and Contractual Obligations

The Rigaku Group will comply with all applicable laws, regulations, standards, and contractual obligations related to information security.

5. Incident Response and Prevention

In the event of any legal or contractual violations or information security incidents, the Rigaku Group will respond promptly and appropriately, and will work diligently to prevent recurrence.
