Philosophy

We aspire to be a company that is fully aware of the importance of environmental management, by sharing the recognition that safeguarding the global environment is a major issue for the survival of humanity and to ensure the perpetual prosperity and sustainability of enterprises.

Environmental policy

As a company that contributes to the development of science and technology in the world with X-ray diffraction equipment, fluorescence X-ray spectrometers, thermal analysis equipment, semiconductor process evaluation equipment, etc., the Group will seek to achieve continual improvement and to prevent environmental pollution in accordance with the following policy:
Basic pol

Basic Policy

1. In our business activities, we will implement continual improvement activities to reduce environmental loads and safeguard the global environment.
2. We will seek to ensure environmental conservation in compliance with environment-related laws, regulations, agreements, internal rules, etc.
3. We will contribute to environmental conservation by accurately identifying technologies, materials, and manufacturing processes that help safeguard the global environment and by developing and designing products that support them.
4. In our business activities, we will pursue the following key themes for environmental management:
1) Raising awareness of the importance of reducing environmental loads
2) Promoting energy usage reductions
5. To implement this policy, we will ensure that all employees are aware of and understand environmental activities and information and raise their awareness of the importance of environmental issues.
6. We will cooperate with local communities to implement environmental improvements and publish this environmental policy if requested to do so from people inside or outside of the Group.
